

PROFESSIONAL SERVICES

Implementation Workshop

The CyberSource Implementation Workshop will provide your technical and business teams with the information they need to integrate to CyberSource as quickly and efficiently as possible, enabling you to start transacting faster.

Workshop Overview

The CyberSource Implementation Workshop enables merchants to start using CyberSource services more quickly.

Many merchants' business and technical teams face resource and time constraints in fully understanding and then developing mission-critical integrations such as those to CyberSource. Furthermore, assessing the impact to business processes, which must underpin any technical development, is often an area that merchants require guidance and assistance with.

A CyberSource Solutions Architect will immediately deliver value to your business by providing your team with all the information and proactive consultation that they require. They will then be able to integrate to CyberSource quickly, correctly and efficiently, avoiding common pitfalls and enabling you to start transacting faster.

Key Features

Workshop topics, which will be driven by your specific requirements, can include:

- Examination of your business process and how best to incorporate the use of CyberSource services
- Best practice approach regarding the CyberSource API, including a detailed overview of all request and response data fields
- Guidance about testing the CyberSource service, including discussion around test cases and test data
- Outline a project plan listing the required steps, both business and technical, to achieve a fast and successful integration
- Depending on requirements, a bespoke recommendations document can be produced to serve as guidance for your integration project

Key Benefits

- Quickly and efficiently get up-to-speed on all of the business and technical implications involved in your integration
- Understand the full scope of the work involved from the very beginning, avoiding common pitfalls that can delay integration projects
- Ensure that you are getting the full benefits for your business from all of the functionality available as part of the CyberSource service
